## Keen Technology

Bring the Silhouette<sup>™</sup> Lighted Mirror and Ascension<sup>™</sup> Mirrored Cabinet to life with the beauty and functionality of Keen<sup>™</sup>, which offers dimming, eco-friendly technology, and Night Glow with a touch.

## THE RICHEST DIMMING EXPERIENCE

Keen's thoughtful design provides a complete range of light levels to satisfy your every lighting need. Plus, the innovative engineering makes interacting with Keen a luxurious experience:

- The intuitive interface is seamlessly integrated into the mirror, offering a sleek and beautiful design.
- Lighting initiates at full brightness and dims down and back up by touching and holding the Keen icon.
- Night Glow mode provides just enough lighting to safely guide you when the room is dark, and the Eye-Sensitivity Adjustment technology automatically reduces the light level as your eyes adjust to low light.

Keen is available as an upgrade in the Silhouette<sup>™</sup> lighted mirror (page 48) and included in the Ascension<sup>™</sup> mirrored cabinet (page 70). Keen must be connected to earth ground in accordance with NEC code 250.20 (B). Improper ground can result in irregular function of the unit.

## THE SMARTEST ECO-FRIENDLY TECHNOLOGY

The intelligent sensor in Keen supports your commitment to the environment:

- It dims your lighted mirror after an hour of non-use, so you're helping the environment even when you forget to turn the lights down.
- Energy consumption is reduced on average by 60%, making a big impact automatically.

## THE EASIEST OPERATION

Tap to cycle through On, Night Glow, and Off.

Touch and hold to gradually change light between 100% and 10% brightness.

After one hour of non-use, Keen's Energy Save Mode automatically dims the lights to 10% brightness
